SAINT 11.1 Release

The official release date for the latest major version of SAINT and SAINTcloud is October 27, 2026. This release contains the following changes.

Redesigned reports

- Modernized look and feel, consistent with web interface
- Customizable title page
- Page headers and footers

Single Sign-On

- Configure SAINT to use your SAML Identity Provider for authentication
- Configurable globally or per user

SAINT Docker container

- Deploy SAINT quickly and easily in a container

Other new features

- Architecture-independent Ubuntu agent
- API rate limiting
- Full file paths shown in technical details for file-based checks
- Option to apply automatic data load setting on demand
- Software inventory in agent scans
- Updated CIS benchmarks
