

SAINT Galatea Release

The official release date for the latest major version of Security Suite and SAINT Cloud is December 8. Read below for the details on this release.

What's in this Release

Risk Analysis (beta version)

- Risk scores per vulnerability help prioritize remediation
- Risk scores per host show where greatest risk exists
- Risk dashboard showing overall risk posture, critical asset risk, and more

Asset Rules

- Automatically set risk factors and asset tags based on scan results, scan policy, and target attributes
- Choose rule set at job creation, or apply on demand
- Get started quickly using default built-in rule set

Architecture Upgrades

- NodeJS/Puppeteer replaces PhantomJS
- Removed dependence on SQLSoup

Other New Features

- Bulk job import
- Analytics and report column showing hardware vendor for MAC address
- Configuration option to specify minimum certainty for Nmap host type fingerprinting
- API calls for managing user permissions
- EPSS scores in API results
