

SAINT 10.5 (Janus Release)

SAINT® Newsletter

The official release date for the latest major version of SAINT and SAINT Cloud is March 25. Read below for the details on this release.

What's in this Release? (Full Video Here)

Active Directory Integration: Dynamically collect and maintain SAINT Assets from Active Directory

- Import assets from one or more Active Directory servers
- Import or update assets automatically or on demand
- Automatic asset tag creation from directory fields
- Choose scan targets by auto-generated Tags to reduce scan setup time
- Ensure new assets are added to SAINT automatically
- Ensure asset IP address changes are updated in SAINT automatically
- Ensure future scans include new assets automatically

Network Mapping: Visualize your assets to see the critical risks in your network

- Visual representation of targets and interconnections
- Color coding to easily identify areas of high risk or severity
- Click on any host for vulnerability details

New Scan Policies and Report Types: Added scan policies that cover your compliance needs as they evolve

- Cybersecurity Maturity Model Certification (CMMC)
- Cyber Essentials

Aggregate and set trend periodicity in Reports: Automatically aggregate selected scans by periodicity (Monthly, Quarterly, etc.) for Trend Analysis Reports

- Default trend settings compare a scan to a previous scan, based on scan date for trending
- Set the new aggregation value in the Report wizard's Advanced settings to aggregate scans that fall within a defined period (Example: weekly scans aggregate to one data point for monthly periodicity)

Other New Features

- User-editable scan result comments
- Bulk report email and download
- Zip and password protection options for report distribution
- Data set aggregation for trend analysis reports
- CVSSv4 compatibility
- Risk scores in Vulnerabilities by CVSS grid
- Risk history charts changed to area charts
- New column that displays the most current "CVSS" score available for a CVE
- New column to display the version the new "CVSS" column score is based on

Latest Vulnerability Checks and Exploits
